# **SPECIFICATIONS**

## 1 Standards & Conditions

### Design Standards

The designs and the productions are in conformity with:

- ISO8528
- GB/T2820
- YD/502-2007
- JB/T20136-2006

Electrical devices have obtained the certification of:

- CSA
- UL

### Environmental Operating Conditions

- Installation place: Outdoors or indoors (well ventilated).
- Ambient temperature: -25°C to 50°C. The coolant heater is needed when the temperature is below 5°C
- Humidity: Less than 80%.
- Altitude: Below one thousand (1000) meters.

### Factory Inspection

- Inspection items.
- Protection devices working test.
- Starting ability in normal temperature.
- 50% rated power load moment capability.
- Voltage deviation and speed variation: 0%, 25%, 50%, 75%, 100%, 110% Load.

### Painting Process

- Painting process specifications and colors are based on the manufacturer's standard.
- The customer could also choose the color which the manufacturer offers.

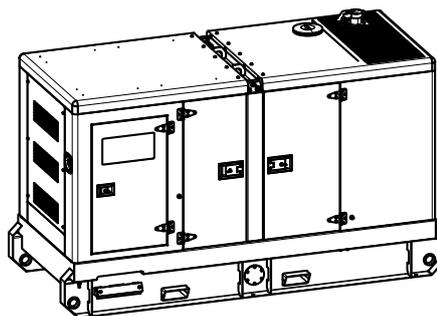

## 2 General Features

- Perkins engine 1104D-E44TAG2
- Close coupled to Leroy-somer alternator LSA44.3S5
- Microprocessor control module PLC-7420
- Communication gateway DSE 892
- ABB main circuit breaker: 400A
- Rotate speed governor: ECU
- Excitation system: Self excited , SHUNT
- A.V.R model: R250
- Key switch

- Emergency stop switch
- ATS (automatic transfer switch) receptacle
- 1x12V/120AH sealed for life maintenance free battery
- Lockable battery isolator switch
- Power coated canopy
- 50°C radiator
- Oil pump on the engine
- Steel base frame with forklifts
- Vibration isolators between the engine/alternator and base frame
- Dry type air filter
- Base fuel tank for 8 hours running
- Drain points for fuel tank
- Operation Manual / Specifications

## 3 Equipment Specification

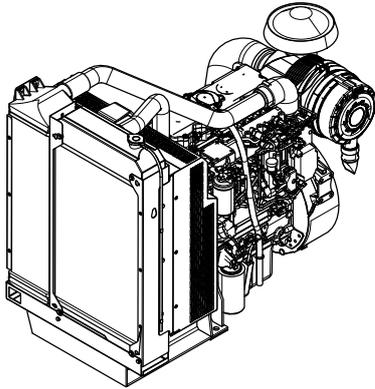

### General technical data

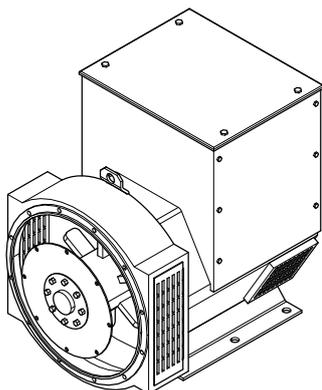

|                                 |                  |
|---------------------------------|------------------|
| Model.....                      | WPS100D6S-EPA    |
| Structure type .....            | R                |
| Tank capacity.....              | 240L             |
| Dry weight.....                 | 1775kg           |
| Sound pressure level @ 7m ..... | 71.2dBA          |
| Dimensions LxWxH.....           | 2788x1130x1680mm |
| Standby Power .....             | 125kVA/100kW     |
| Prime Power.....                | 114kVA/91kW      |

|                                |      |      |      |      |      |
|--------------------------------|------|------|------|------|------|
| Voltage                        | 208V | 220V | 230V | 240V |      |
| Ampere                         | 305A | 289A | 276A | 264A |      |
| <b>Genset Fuel Consumption</b> |      |      |      |      |      |
| Frequency/Load                 | 25%  | 50%  | 75%  | 100% | 110% |
| 60Hz (L/h)                     | N/A  | 15.9 | 22.2 | 27.5 | 29.8 |

## Dck Yf 'GrghYa

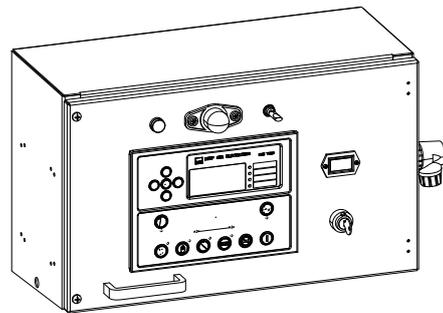

|                                 |  |
|---------------------------------|--|
| Engine Manufacturer/Brand.....  | Perkins                                |
| Engine Model.....               | 1104D-E44TAG2                          |

| Altitude.....   | ≤1000m                          |
| Overspeed.....  | 2250 rpm                        |
| Air Flow.....   | 0.514m³/s(50HZ),0.617m³/s(60HZ) |
| Voltage Regulation.....                                   | ±1.0%                           |
| Total harmonic TGH / THCat no load < 1.5 % - on load < 5% |                                 |
| Telephone Interference.....                               | THF<2%;TIF<50                   |

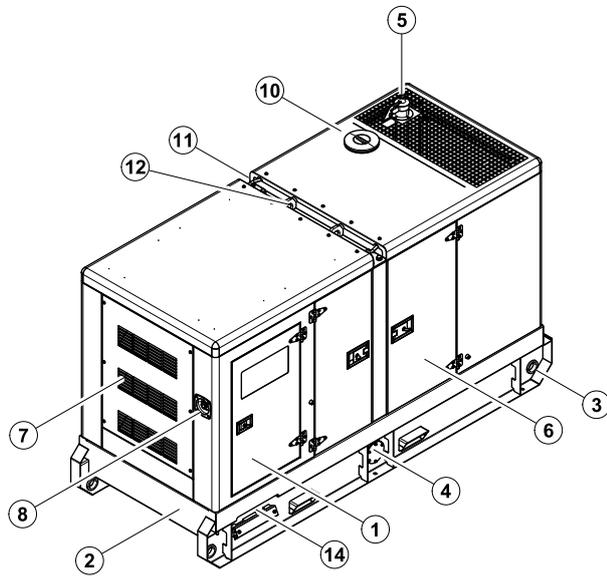

## PLC-7420 Control System

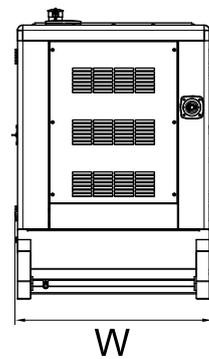

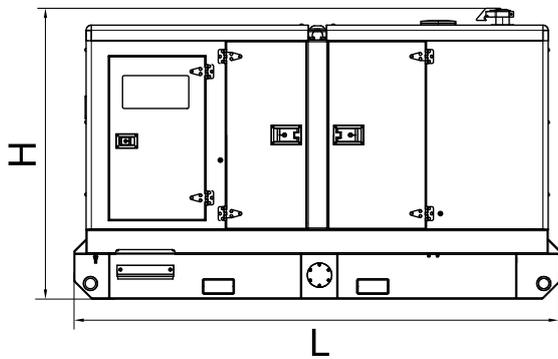

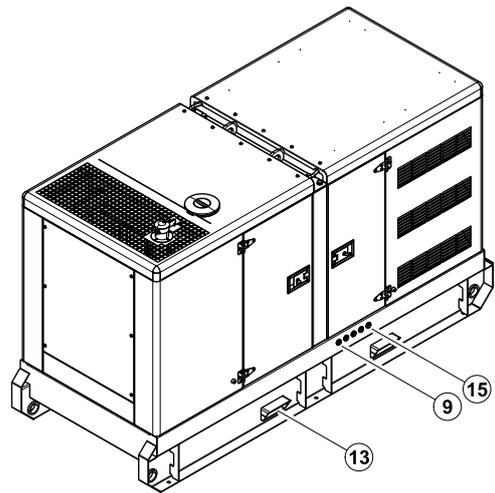

PLC-7420 is an advanced control module based on micro-processor, containing all necessary functions for protection of the genset and the breaker control. It can monitor the mains supply, and automatically start the engine when the mains is abnormal. Accurately measure various operational parameters and display all values and alarms information on the LCD. In addition, the control module can automatically shut down the engine and indicate the engine failure.

- Microprocessor control, with high stability and credibility
- Monitoring and measuring operational parameters of the mains supply and genset
- Indicating operation status, fault conditions, all parameters and alarms
- Multiple protections; multiple parameters display, like pressure, temp. etc.
- Manual, automatic and remote work mode selectable
- Real time clock for time and date display, overall runtime display, 250 log entries
- Overall power output display
- Integral speed/frequency detecting, telling status of start, rated operation, overspeed etc.
- Communication with PC via RS485 OR RS232 interface, using MODBUS protocol

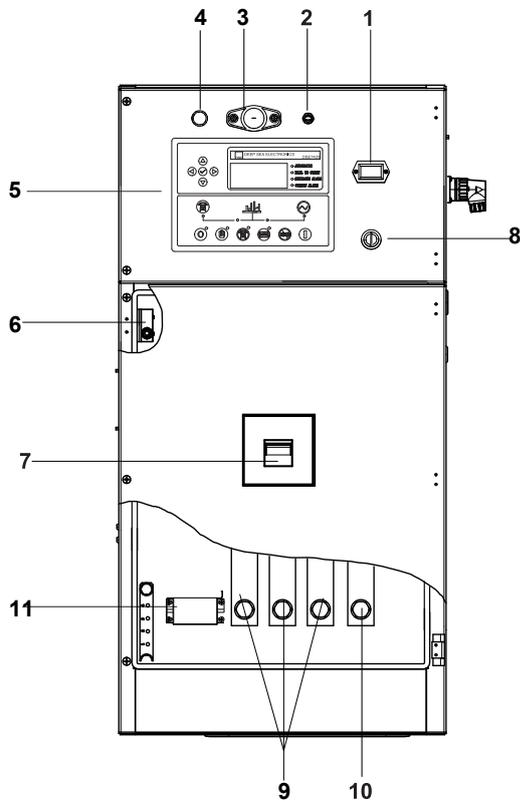

## 4 Overall Dimensions

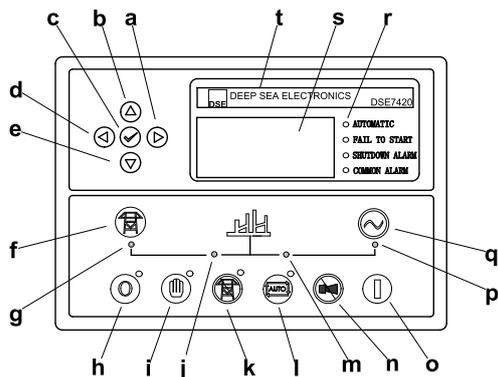

- |                         |   |
|-------------------------|---|
| ⑧ Emergency stop switch | ⑮ External fuel inlet/return hose fitting |
| ⑦ Air inlet             | ⑭ Cable trench                            |
| ⑥ Access door           | ⑬ Fork lift channel                       |
| ⑤ Exhaust gas outlet    | ⑫ Lifting lug                             |
| ④ Fuel drain            | ⑪ Roping lug                              |
| ③ Tie down              | ⑩ Coolant inlet                           |
| ② Base frame            | ⑨ Coolant/Oil drain hose fitting          |
| ① Control cabinet       |   |

## 5 Control System

**Control & field wiring cabinet**

**Control module**

| Ref. | Description  |
|------|--|
| 1    | Time counter                                       |
| 2    | Control panel lamp switch                          |
| 3    | Control panel lamp                                 |
| 4    | Charge indicator                                   |
| 5    | Control module                                     |
| 6    | Limit switch                                       |
| 7    | Main circuit breaker                               |
| 8    | Key switch   |
| 9    | Live wire terminals                                |
| 10   | Neutral wire terminal                              |
| 11   | Mains input/Remote control communication connector |
